

To whom it may concern,

I've known Declan four years. I've worked with him a lot! Talked with him extensively. Monitored him without him knowing. He is a great representative to pursue a engineering degree or any other field he wishes. He's mentally and physically capable. He's very focused and disciplined. He has a great family that will stay behind him. He's a rare young man. He's honest, humble and eager to please. I own a company and trust him with anything of mine.
